WORK EXPERIENCE

React Developer
RazrCorp

01/2021 - Present   *Navi Mumbai, India*
A product based company helping creators directly monetize their premium content!

Achievements/Tasks

- Lead the front-end team on building stage.inc. A modern suite of products for fans to interact with their favourite creators using live streaming, real time messaging and an e-commerce platform to purchase the creators' premium content (photo, video, albums etc.). tech stack - React, Redux, Firebase, Agora, AWS, NextJS.
- Migrated the entire codebase to NextJS resulting in faster performance while reducing the code footprint by over 20%.
- Worked on a dashboard for creators to manage their content and income using various analytics. Also has a feature to roll out payments for their earned amount in multiple ways.

Junior Software Developer
Vesatogo Innovations.

05/2019 - 01/2021   *Nashik, India*
A platform for agribusinesses and their farmers to help them in identifying inefficiencies in operations and thus save costs.

Achievements/Tasks

- Built a dashboard from the scratch for fleet management having advanced features like live vehicle tracking, live analytics, vehicle mangement, vehicle scheduling, produce inwarding and resource settlement. tech stack - React, GraphQL, Apollo Client, Google Maps, AWS, GitLab, BlueprintJs.
- The dashboard is responsible for inwarding over 100,000MT of produce.
- Built a dashboard from scratch for managing orders and plot harvests. tech stack - React, TailwindCSS, GraphQL, Apollo Client, Hasura (for real time subscriptions)
- Built the chrome extension for feeding live data from a weighing sensor into the web app.

SKILLS

ReactJS · JavaScript · CSS · GraphQL · NextJS · GatsbyJS · Django · Python · Docker · AWS · GitLab · Git · CI/CD · TypeScript · Python · Terraform · NodeJs · PWA · Responsive Design · TailwindCSS · Firebase · SQL · Redux

PERSONAL PROJECTS

Portfolio Website ⬈
- Designed and developed my own website using GatsbyJs, TailwindCSS and GraphQL. Focuses on clean scalable code and includes a sweet dark mode!

Royal Crockery ⬈
- A modern ecommerce backend built using cutting edge technologies like Django, Docker, Terraform, GraphQL. It has been deployed to AWS using its various services like ECS, ECR, RDS, Route53 etc. It also has RazorPay integration for processing payments! It is hands down my most complex personal project. please check out the linked repository for more info

Lights Out ⬈
- A fun browser based game built using react in which the user has 50 turns to light on the entire board. each click toggles the 4 surrounding tiles

EDUCATION

Master of Computer Applications (MCA)
Sandip University

06/2020 - Present   *Nashik*

Bachelor of Computer Science
Savitribai Phule Pune University

09/2016 - 06/2019   *Nashik*
